

Dataset(s)

The project uses sample CV and resume documents for testing and evaluation. The dataset includes PDF and DOCX resumes created manually by the team as well as publicly available resume examples from online resources.

The dataset is used to test:

- CV upload functionality
- PDF and DOCX text extraction
- AI feedback quality
- Score generation
- Formatting and structure analysis

Different types of resumes are included in order to test multiple scenarios:

- student CVs
- internship resumes
- beginner job seeker resumes
- weak and strong CV examples

The team may also generate synthetic CV examples to test edge cases and improve AI feedback quality.
